The Raspberry Pi, launched back in 2012 is the best selling over **5 million** units back in 2015, and **19 million** so far this year.

<https://www.raspberrypi.org/>

The PI's have a wide variety of uses which include,

RETRO GAMING ...Let's take a look!

What you'll need to game:

Software:

<https://retropie.org.uk/download/>

Hardware:

Raspberry Pi

HDMI

SD CARD

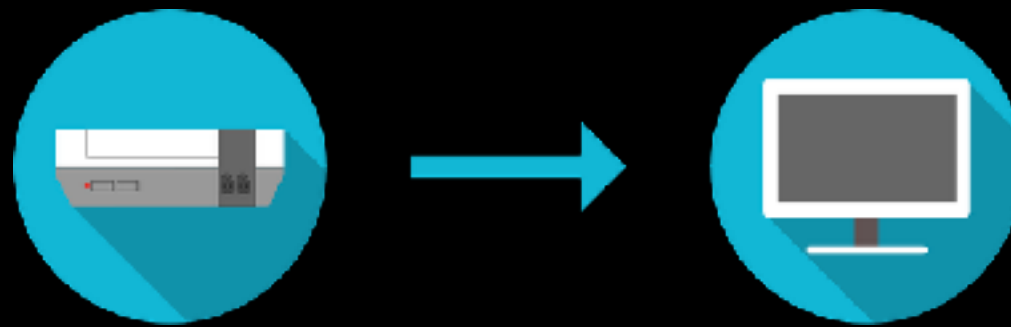

CONTROLLER/S

&&
||

FEATURES:

Emulates over 50 Games machines from ZX Spectrum - N64

Drag Drop ROMS...

Use any controls, Ps4 controller / Keyboard...

Let's Play!

Additional:

run `sudo raspi-config` - will get us into the terminal to do the following,

expand the file system - must be done

enable ssh so we can load roms via mac

change the password - must be done

Boot from terminal: run `emulationstation`

Get Roms onto the device SSH into PI:

MAC OS X open finder, select "Go" menu and "Connect to Server". Type `smb://retropie` and hit "Connect".
